Target version:	3.X.Y	Spent time:	0.00 hour
Bugzilla-Id:	2036		

Description

allow user to turn on and off (display or not display) text annotations at an individual port level, all ports for an actor level, at an actor level for the general annotation of an actor (not ports), and a global level on/off for the entire workflow

this will allow users to display the information when they need it at various levels and also an easy way to turn all annotations on and off
