#### Description

The libexpat.dll file is used by the GARP code in workflow that contain GARP. A copy of this dll is in the \$KEPLER/lib directory and Java is set to look there for dlls, but it is the C code of GARP that is looking for this dll. It needs to be copied to Windows/System32/ dir for the GARP workflows to operate OK.

#### History

##### #1 - 05/24/2005 01:04 PM - Dan Higgins

fixed in the alpha6 installer

##### #2 - 03/27/2013 02:18 PM - Redmine Admin

Original Bugzilla ID was 2046
