Kepler - Bug #2051

Could Not Get EML Metadata in existed workflow

03/23/2005 12:24 PM - Jing Tao

Status: Resolved Start date: 03/23/2005 **Priority:** Due date: Normal Assignee: Jing Tao % Done: 0% **Estimated time:** Category: actors 0.00 hour Target version: 1.0.0alpha6 Spent time: 0.00 hour Bugzilla-ld: 2051

Description

In EML Simple Plot workflow, you click get metadata and will get an error. But in search result panel and draging search result to canvas, the function works fine.

History

The problem is the old workflow moml, it doesn't has a namepsace parameter. We add a default value for it. And it works now.
