Target version:	1.6	Spent time:	0.00 hour
Bugzilla-Id:	2081		

Description

Johnoel sent a some modification to code for action=export. The file which is sent back to the user doesnt have .zip in the end and has a very generic name.

So Johnoel requested addition of this line of code in MetaCatServlet.java which sets the name of the file to <docid>.zip

```
response.setHeader("Content-Disposition", "attachment; filename=" + docId + ".zip");
```
