Description

using dataset:
seabloom.5.2
Sedgwick BYDV Prevalence

- 1) generate a data form
- 2) choose table "bydv-data-out.csv" for generation
- 3) see exception:
note "ID = data_form_seabloom.5.2_table_No_such_entity!.ser"
am i replacing dashes **before** asking datapackage for the entity? (hence "No_such_entity!"??)

Exception in thread "Thread-7" java.lang.IllegalArgumentException: Non-valid ID received:
ID = data_form_seabloom.5.2_table_No_such_entity!.ser
(contains illegal characters)
xulFile = <?xml version="1.0"?>
