#### Description

Focus of this redesign is on a highly intuitive user interface. If we have to choose between usability and generality, choose usability. Explore the use of HTML forms as reconfigurable forms, and other scripted layout approaches. Chris and Dan agreed to look into this.

#### History

##### #1 - 06/06/2001 10:14 AM - Chris Jones

Dan is actually working on this anyway, so I've re-assigned it to him.

##### #2 - 06/26/2001 09:38 AM - Dan Higgins

New tree+form XML editor has been implemented in MORPHO\_ALPHA\_3. This editor uses DTD parser, Java JTree, and recursive form(panel) displays. Also has ability to customize the display for any node and include help information from external documents.
