Category:	interface	**Estimated time:**	0.00 hour
Target version:	3.X.Y	**Spent time:**	0.00 hour
Bugzilla-Id:	2106		

Description

provide mechanism for user to save search results via "shopping cart" idea
where users marks (checks) which items they want to save and they are saved
off somewhere

three display alternatives in the UI are:
1) somehow integrate "saved items" to display in the current left pane
2) launch new window from a "saved items" button
3) add a "saved items" tab
