Target version:	2.x.y	Spent time:	0.00 hour
Bugzilla-Id:	2130		
Description Not able to delete rwilliams.4.1 and rwilliams.10.1 from KNB. The message sent back by Metacat is Docid rwilliams.4.1 does not exist. Please check that you have specified the revision number of the document also This error is generated in DocumentImpl after running followign query: "SELECT * FROM xml_documents WHERE docid = ?" (The logs indicate that ? was replaced by rwilliams.4) If no record is found, then the above error is generated. Otherwise the document is deleted. Hence it means no document was found. However, running the same query via sqlplus returns one record. Weird.			

History

#1 - 03/27/2013 02:19 PM - Redmine Admin

Original Bugzilla ID was 2130

#2 - 04/10/2013 11:20 AM - ben leinfelder

- Assignee changed from Saurabh Garg to ben leinfelder

Both of these documents still exist - not sure if they should be deleted or not. They are <http://ecoinformatics.org/eml-dataset-2.0.0beta6/EN> docs.
