Target version:	1.6	Spent time:	0.00 hour
Bugzilla-Id:	2131		
Description			
Following bugs were reported by Veronique in Geographic Coverage screen			
1. Morpho accepted the coordinates i entered in the NDPW, but when i clicked "edit" in the NDPW to edit the coordinates, the coordinates were reset to 45.0 N, 45.0 S, 90.0 W, 90.0 E.			
2. i clicked on edit, but then clicked on cancel. the coordinates i had entered were displayed in the NDPW. i finished the NDPW and the dp opened: the coordinates that were displayed were			
West: -90.0 degrees			
East: 90.0 degrees			
North: 45.0 degrees			
South: -45.0 degrees,			
not the coordinates i had entered (even though i clicked on cancel for editing)
