

Kepler - Bug #2133

Need ability to update data searches

06/23/2005 10:53 AM - Dan Higgins

Status:	New	Start date:	06/23/2005
Priority:	Normal	Due date:	
Assignee:	Jing Tao	% Done:	0%
Category:	data access	Estimated time:	0.00 hour
Target version:	3.X.Y	Spent time:	0.00 hour
Bugzilla-Id:	2133		
Description			
<p>Currently, when a data search is done, the results are stored in the local cache. Updates to the ecogrid which would extend search results will not show up unless the local cache is deleted!</p> <p>There needs to be some interface/GUI (button?) to reset the cache so that new search results can be obtained without dumping the local cache.</p>

Blocks Kepler - Bug #2141: resultset cache expiration problem		Resolved	07/05/2005

History

#1 - 11/02/2005 05:09 PM - Matt Jones

This is related to the cache expiration bug.

#2 - 02/13/2006 02:23 PM - Kevin Ruland

Searches in the quick search window are configured to expire at end of session. To receive new results, one just needs to restart Kepler.
