Bugzilla-Id:	2148		

Description

Some download fields need to be "backfilled." Species area info, for example, needs to be filled in if null to reflect "master" fields. Other fields, like authorLocation, need NOT to be visible.

Need to add/make sure there: 8 names for species curr/orig interps. + accessionCodes (need to lookup) + "best" comm Interp - not sure how to get that really.

History

#1 - 07/12/2005 07:37 AM - Michael Lee

area fields backfilled. location fields hidden. 8 names added to taxonimportance.

STILL NEED TO:

add comms to plot download: best fit, most recent, original interp - names systems? - party names?

#2 - 07/12/2005 10:25 AM - Michael Lee

communities denormalized and included in download.
