

Morpho - Bug #2198

Morpho editor generates validation problem message when doc is valid

09/16/2005 12:58 PM - Veronique Connolly

Bugzilla-Id:	2198		

Description

In Morpho 1.6.CR1, when you open the editor and click on OK right after (without making any changes within the editor), the following message appears:

Validation Problem!

The saved document is not valid EML2 for some reason. You can save it locally and fix the problem later, but you will be unable to submit it to the network storage system.

Do you want to Continue Exiting the Editor?

This happened to me for data packages that I created in Morpho using the NDPW and which were EML valid according to the EML ID and References Parser (<http://knb.ecoinformatics.org/emlparser/index.html>).
