

## Morpho - Bug #2203

### Morpho editor gives validation problem message when you don't trim

09/20/2005 11:07 AM - Veronique Connolly

<b>Target version:</b>	1.6.1	<b>Spent time:</b>	0.00 hour
<b>Bugzilla-Id:</b>	2203		
<b>Description</b>  When you open morpho editor, click on "show all", make a change in one of the nodes that appeared, and then click on OK (to close the editor) without clicking on "Trim", you get this message:  Validation Problem! The saved document is not valid EML2 for some reason. You can save it locally and fix the problem later, but you will be unable to submit it to the network storage system. Do you want to Continue Exiting the Editor?			

#### History

##### #1 - 09/20/2005 02:08 PM - Margaret O'Brien

This is morpho version 1.6rc1  
Error message from morpho's tree editor varied depending on how I reached the tree editor.  
When morpho can't edit using one of the dialog boxes, it defaults to the tree editor. When it finds invalid eml, the error message is something like "this file is not valid EML for some reason and cant be saved to the network". There is no indication of what part of the doc is invalid, so this message is not much use.  
But when I reach the tree editor by choosing "Documentation->Add/edit documentation", there is a much friendlier error message for invalid EML, which gives you the paths that are missing content. Can this very useful error message replace the one mentioned above?

##### #2 - 10/05/2005 11:43 AM - Saurabh Garg

There is not enough information in this bug to reproduce it. And this bug might be dependent on bug # 2200.

Hence I think it would be a good idea to ask Veronique and Margaret to test Morpho once 2200 is fixed. If they cant reproduce the bug, then we can close it. Otherwise, they can enter a more detailed bug report about how to reproduce the problem.

##### #3 - 10/21/2005 12:44 PM - P. Anderson

One of the problems is fixed. I pointed the parser/validator at the right xsd based on eml version.

Bug # 2200 is the other problem which could be leading to this error message.

##### #4 - 06/27/2006 02:36 PM - Jing Tao

After fixing bug 2200, this bug was fixed too.
