Description

In the Temporal Coverage of Data section of the NCEAS Data Repository form (<http://knb.ecoinformatics.org/cgi-bin/register-dataset.cgi?cfg=nceas>), the year, month, and day are indicated as being required. However, if you enter a year, but don't select a month and/or day (leave them as "0"), you don't get an error message for the missing month and day, and the values that you left as "0" become "1" (01 01 yyyy).

We should allow the user to provide the year only (month and day would not be required fields), and the month and day should not be displayed if they were not selected.

History

#1 - 10/04/2005 11:44 AM - Saurabh Garg

Fixed. Now only the year is required in the form.
