Bugzilla-Id:	2225		
Description Currently, our eml parser in kepler couldn't handle attribute list reference. And it couldn't handle entity reference either. We need to fix this bug.			

History

I believe the parser has been fixed to now properly follow references in EML.
Test and close this bug if true.

I double cheked code. It only shows attribute reference can be handle correctly.
but attributeList and entity couldn't. I am not sure if this is enough.
