Kepler - Bug #2231

Documentation system implementation

10/17/2005 10:58 AM - Ilkay Altintas

Status:	Resolved		**Start date:**	10/17/2005
Priority:	Normal		**Due date:**	
Assignee:	Ilkay Altintas		**% Done:**	0%
Category:	documentation		**Estimated time:**	0.00 hour
Target version:	1.0.0beta1		**Spent time:**	0.00 hour
Bugzilla-Id:	2231			

Description

-- How-to manuals chapters for specific computational tasks (patterns of use)
(for example, how to do iteration in a workflow)
-- Generate a template automatically from the actor code and put it in the kar.
The detailed documentation should be later filled in manually on this template
by the doc writer.
-- Solidify the actor metadata format before Oct 26th 2005. Explain this at the
meeting that day. Detail: WE'LL UPDATE WHAT MATT HAS PUT TOGETHER AND ALSO
GENERATE DOC TEMPLATES FOR 3 EXAMPLE WORKFLOWS. Then we'll let Samantha and
Laura know to put it.
-- Go over the actor list and generate a web page including links to all the
kars and their documentation in a structured form.
-- Create an XSLT processor to format documentation from the metadata.
-- Implement a Java application to automatically create doc metaata templates
and list of actor for the webpage.

Bug Also Assigned to : Nandita Mangal

#2 - 03/22/2006 04:11 PM - Ilkay Altintas

This bug is old now. Most of these things evolved and has been done in
different ways,so I'm closing it. Please assign other bugs on documentation.
