Description On the left-hand side of the Kelper UI, the text field in which the user types search terms is only 1 character wide when displayed on Mac OS X - this is because the buttons are much wider than those on windows/linux			

History

Screenshot showing the truncated search text field on OS X

#2 - 11/03/2005 08:19 PM - Matthew Brooke

fixed by fixing part of bug #2108 - textfield is now on its own line, so no buttons to squash it up
