

Metacat - Bug #2237

web.xml, tomcat and jstl

Bugzilla-Id:	2237		

Description

I've been using JSP and Java Standard Tag Library functions with files in metacat, and got tomcat5 errors because tomcat5 wants the web.xml file to be pointing to this schema instead of the dtd used by tomcat3 and tomcat4:

xsi:schemaLocation="http://java.sun.com/xml/ns/j2ee
http://java.sun.com/xml/ns/j2ee/web-app_2_4.xsd"

The tomcat errors occurred when using the jstl with the earlier dtd, but I had no problems after switching to the schema in sbc's installation. Here is a reference:

<http://www.javaworld.com/javaforums/printthread.php?Cat=&Board=Enterprisejava&main=18070&type=thread>

Two additional jar files are required to run jstl (jstl.jar, standard.jar). It would be very convenient to see these included with metacat, although they are also easily added by a user.

History

#1 - 03/27/2013 02:19 PM - Redmine Admin

Original Bugzilla ID was 2237

#2 - 04/10/2013 11:17 AM - ben leinfelder

- Assignee changed from Saurabh Garg to ben leinfelder

- Status changed from New to Rejected

Now using v2.5 schema:

```
<web-app xmlns="http://java.sun.com/xml/ns/javaee"
  xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
  xsi:schemaLocation="http://java.sun.com/xml/ns/javaee http://java.sun.com/xml/ns/javaee/web-app_2_5.xsd"
  version="2.5">
```
