Target version:	1.0.0beta1	Spent time:	0.00 hour
Bugzilla-Id:	2242		
Description Current metacat ecogrid node is hosted on ecoinfo2. This needs to be moved to the new metacat on knb.msi.ucsb.edu. This allows us to wipe ecoinfo2 for use as the new LDAP and CVS and web server.			

History

#1 - 03/01/2006 11:25 AM - Jing Tao

The new ecogrid server in knb.msi.ucsb.edu works for couple month. It seems well. The only issue is some non well-formed xml document couldn't be replicated to new server (all data files had been replicated to new server successfully).

#2 - 04/17/2006 10:55 AM - Matt Jones

Done. Both the KNB metacat and the EcoGrid interfaces now live on knb.msi.ucsb.edu. FIXED.
