Category:	documentation	**Estimated time:**	0.00 hour
Target version:	3.X.Y	**Spent time:**	0.00 hour
Bugzilla-Id:	2251		

Description

We need to write documentation for users of the phylogenetics actors in Kepler.
This documentation should include:

1. Instructions for installing programs wrapped by phylogenetics actors and
configuring Kepler to use these programs.

2. Sample workflows and data sets demonstrating the capabilities of the
phylogenetics actors.

3. Tutorials using the sample workflows as examples.
