Description

The process which serializes ecogrid resultsets to disk (used in the kepler cache system) does not produce proper xml files. In particular it does not attempt to create entity references for the characters: &, <, >, ", '. It does not support unicode.

History

#1 - 11/29/2005 11:10 AM - Kevin Ruland

Fixed in axis-only-branch by using the axis generated de-/serializer. This fix could be ported to the globus codebase without much issue (I think...).

#2 - 07/26/2007 10:55 AM - David Sledge

Closing this out because the API no longer uses grid services

#3 - 03/27/2013 02:19 PM - Redmine Admin

Original Bugzilla ID was 2274
