Target version:	1.8.0	Spent time:	0.00 hour
Bugzilla-Id:	2284		
Description			
<p>I saved a dp named connolly.258.1 to the knb metacat. This dp contains two data tables: ecogrid://knb/connolly.261.1 and ecogrid://knb/connolly.262.1.</p> <p>When I searched for that dp in Morpho and opened it, I got an error message saying "Exception opening file!". When I clicked OK for this message, I got another dialog box saying the following:</p> <p>"Unable to display this data. However, an empty table with the column header information will be shown. Data is referenced by the URL ecogrid://knb/connolly.261.1"</p> <p>I got the same kinds of messages when trying to display ecogrid://knb/connolly.262.1.</p>			

History

#1 - 12/01/2005 08:50 PM - Veronique Connolly

This happened to me for four additional dps: connolly.257.7, connolly.274.1, connolly.282.1, and connolly.287.1

#2 - 07/29/2008 09:33 AM - Callie Bowdish

I suspect that this is an issue with doc id and profile settings for last id when using more than one computer.

#3 - 08/12/2009 03:22 PM - Jing Tao

move to 1.7.1

#4 - 08/12/2009 03:22 PM - Jing Tao

move to 1.7.1

#5 - 09/08/2009 10:46 AM - Jing Tao

After change the saving process, it should work now
