SEEK - Bug #2291

define faults for all EcoGrid services

11/29/2005 12:12 PM - Matt Jones

Status:	New		**Start date:**	11/29/2005
Priority:	Normal		**Due date:**	
Assignee:	Kevin Ruland		**% Done:**	0%

Target version:	ecogrid-1.0.0		**Spent time:**	0.00 hour
Bugzilla-Id:	2291			

Description

The current API needs to be modified to be able to pass back faults for error conditions. To close this bug, we need to:

1) design an intelligent set of faults that covers conceivable error conditions and provides a human readable message appropriate for display to users
2) add these faults to the WSDL definitions of the ecogrid apis, making sure to support both SOAP and HTTP bindings where they exist
3) implement the faults for each of the services (metacat, digir, srb)
