Description			
<p>The current Metacat implementation uses grid services. Need to migrate it to use only web service methods using the new WS build system that is checked in under the 'axis-only-branch'. The migration should happen in two phases.</p> <p>First:</p> <ol style="list-style-type: none">1) get operation2) query operation <p>These are already completed in the branch I think.</p> <p>Then afterwards:</p> <ol style="list-style-type: none">3) login/logout operations (will be deprecated eventually)4) put operation
