Bugzilla-Id:	2296			

Description

The current DiGIR implementation uses grid services. Need to migrate it to use
only web service methods using the new WS build system that is checked in under
the 'axis-only-branch'.

First:
1) get operation
2) query operation

These are already completed in the branch I think.

The other methods (login, logout, put) are not currently relevant to DiGIR as it
is a read-only service.
