Kepler - Bug #2302

Problem unzipping hierarchical data

11/29/2005 01:58 PM - Dan Higgins

Bugzilla-Id:	2302			

Description

When EML Datasources point to zipped data files, the data is supposed to be automatically unzipped when downloaded. This works OK when the zipped file directory is 'flat'; but when the zip file contains a hierarchy (e.g. has a top level dir 'topdir' which contains one or more other files), the automatic unzipping fails!

History

#1 - 12/10/2007 12:23 PM - Dan Higgins

This issue has not been a problem in any workflows to-date. Thus pushing back to Post 1.0 release
