Morpho - Bug #231

Consistent searching problems

04/26/2001 03:54 PM - David Blankman

Description

Using the web interface for searching produced consistent and expected results. Searching from Morpho, however, produced strange results. For example, using simple catalog search with "title" selected, I entered the term "test" in the SUBJECT field with author left empty. Morpho returned 1 document. When I put "Blankman" in the AUTHOR field and selected the AND button, it returned 5 documents (the expected result). I emailed Dan with screen shots showing Morpho and Web results for the same search term.
