#### Description

In Mac OS X only, the + and - buttons for completely collapsing and expanding elements are not initially rendered when entering the tree editor. If the tree editor window is resized or the bar dividing the lefthand and righthand portions of the window is moved, the buttons appear and function normally.

#### History

##### #1 - 06/06/2006 04:45 PM - Jing Tao

This is because the buttons were not set preferred size. Different OS will render these button differently if no preferred size were not set.

So after setting the preferred size, this bug was fixed. I tested in windows, Mac OS and linux and it seemed every os can display them correctly.
