### Description

Currently, Morpho uses the <scope> and <lastId> to generate the next document id for any new document. When saving locally, if a document with this id already exists, it will simply be overwritten silently. When saving to the network, the save will generally fail silently. When there is a naming conflict like this, the user should be alerted and given options for how to deal with the confict, such as saving it with a higher revision number, saving it under a different document id, etc.

## History

#### #1 - 07/08/2008 02:21 PM - Callie Bowdish

My understanding is that previous versions of Morpho handle document conflicts. Judith worked with a previous version recently and didn't have the same problems as those working with the current version.

#### #2 - 07/29/2008 09:29 AM - Callie Bowdish

I tested previous version of Morpho 1.6.0 and found that it had problems with doc ids too.

#### #3 - 07/29/2008 01:50 PM - Jing Tao

it is duplicated to bug 3454

- This bug has been marked as a duplicate of bug 3454 ***

#### #4 - 08/12/2009 03:43 PM - Jing Tao

move to 1.7
