| Description | | | |
| 1) open a workflow (can be a blank one) 2) go into full screen mode, either by selecting "Full Screen" on the "View" menu, or by clicking the "Full Screen" button on the toolbar 3) use the "Esc" key to return to regular screen size -> the scrollbars have now disappeared from the graph frame | | | |

History

#1 - 12/13/2007 01:20 PM - Dan Higgins

Problem not often encountered; delay fix

#2 - 10/24/2008 01:18 PM - Timothy McPhillips

I am encountering this problem as well (on OSX). The scrollbars disappear when I go to full screen mode. They do not appear when I return to regular screen size. And clicking on the navigation pane does not restore the scrollbars, either.

#3 - 04/20/2009 10:51 AM - Timothy McPhillips

This problem appears now to be worse (running kepler-trunk). Going to fullscreen mode and then hitting escape now causes a NullPointerException:

```
[run] Exception in thread "AWT-EventQueue-0" java.lang.NullPointerException  
[run] at ptolemy.vergil.basic.ExtendedGraphFrame.cancelFullScreen(ExtendedGraphFrame.java:115)
```

#4 - 04/20/2009 10:54 AM - Derik Barseghian

bug [#3900](#) addresses the leaving full screen crash.

#5 - 04/22/2009 03:36 PM - Chad Berkley

Try to figure this out and remove full screen mode if we can't get it fixed before 2.0

#6 - 04/22/2009 03:48 PM - Chad Berkley

- Bug 3900 has been marked as a duplicate of this bug. ***

#7 - 07/09/2009 11:18 AM - Daniel Crawl

I've disabled full screen mode since it crashes returning from full screen. (See my comments why this occurs in KeplerGraphFrame). If this can't be fixed, then the button should be removed.

#8 - 06/12/2012 08:23 AM - Christopher Brooks

There was a problem with scrollbars disappearing after fullscreen, but View->Full Screen has been removed, so this bug is moot.
