

Metacat - Bug #2371

Replication problem with links with '&'

02/28/2006 12:02 PM - Dan Higgins

Bugzilla-Id:	2371		

Description

There seems to be problem in replicating datapackages with links that contain the '&' character.

In particular, consider the knb-lter-gce.232.5 package. Using morpho and KNB, the Online Distribution element is:

http://gce-lter.marsci.uga.edu/lter/asp/db/send_file.asp?name=metacat-user&ail=none&filiation=LNO&tify=0&cession=INV-GCEM-0412b1&lename=INV-GCEM-0412b1_1_0.TXT

while in ecogrid it is:

http://gce-lter.marsci.uga.edu/lter/asp/db/send_file.asp?name=metacat-user&il=none&filiation=LNO&ify=0&ession=INV-GCEM-0412b1&enname=INV-GCEM-0412b1_1_0.TXT

Note the loss of characters after the '&'s !!!

This is making it impossible to retrieve data in Kepler (and in Morpho)

History

#1 - 02/28/2006 01:05 PM - Dan Higgins

Dan, Sid and all,

Note that for reference the online distribution url in the native GCE eml document is as follows, with appropriately escaped ampersands:

http://gce-lter.marsci.uga.edu/lter/asp/db/send_file.asp?name=metacat-user&email=none&affiliation=LNO&notify=0&accession=INV-GCEM-0412b1&filename=INV-GCEM-0412b1_1_0.TXT

Here's a direct link to the latest version of the doc (which should be synchronized to the LNO Metacat in the next day or so):

http://gce-lter.marsci.uga.edu/lter/asp/db/send_eml.asp?detail=full&metacat=yes&missing=NaN&delimiter=tab&accession=INV-GCEM-0412b1

Good luck tracking it down.

Wade Sheldon (GCE)

The bug is fixed in code. The KNB and LTER databases need to be fixed now so that they have the correct versions of the documents. Right now the documents which are replicated are not same as the original documents because of the bug mentioned.

#3 - 06/30/2006 08:23 AM - Saurabh Garg

This bug is fixed. All the GCE documents in KNB database are fixed also. Closing the bug.

#4 - 06/30/2006 08:24 AM - Saurabh Garg

Closing the bug.
