Bugzilla-Id:	2385		
Description			
If I query the DiGIR node with the following condition I get records back: <condition operator="LIKE" concept="ScientificName">trout</condition>			
But if I try the following OR statement, I don't get any records back: <OR> <condition operator="LIKE" concept="Kingdom">trout</condition> <condition operator="LIKE" concept="Phylum">trout</condition> <condition operator="LIKE" concept="Class">trout</condition> <condition operator="LIKE" concept="Order">trout</condition> <condition operator="LIKE" concept="Genus">trout</condition> <condition operator="LIKE" concept="SpecificEpithet">trout</condition> <condition operator="LIKE" concept="InfraspecificEpithet">trout</condition> <condition operator="LIKE" concept="ScientificName">trout</condition> <condition operator="LIKE" concept="HigherTaxon">trout</condition> </OR>			

History

I tested more search in kepler against Digir. Here is the results:

If query =<condition operator="LIKE" concept="ScientificName">trout</condition>

The result set has 4 records.

If query=<OR>

<condition operator="LIKE" concept="ScientificName">trout</condition>
<condition operator="LIKE" concept="Kingdom">trout</condition>
</OR>

The result set has 3 records.

If query=<OR>

<condition operator="LIKE" concept="ScientificName">trout</condition>
<condition operator="LIKE" concept="Kingdom">trout</condition>
<condition operator="LIKE" concept="Phylum">trout</condition>
</OR>

The result set has 2 records.

if If query=<OR>

<condition operator="LIKE" concept="ScientificName">trout</condition>
<condition operator="LIKE" concept="Kingdom">trout</condition>
<condition operator="LIKE" concept="Phylum">trout</condition>
<condition operator="LIKE" concept="Class">trout</condition>
</OR>

The result set has 3 records.
