Description

Allow searching by parties more easily. Filter to only data providers and project organizers, and perhaps plot PIs.

Have a list, make it searchable, then show the plots from those folks. Kind of have this with the "summary" info, but could be better.

similar to this:
http://vegbank.org/vegbank/views/topdata.jsp?getonly=2&perPage=20

but more of a query, less of a browse

you can now search for people much more easily, from the party summary page:

http://aldo.vegbank.org/get/summary/party

Now this bug pertains to limiting the search to just those parties who have contributed to a plot or submitted the plot. So "Peet" [contrib] would search for all peet(s) who contributed to at least one plot. "Peet" [submit] would search for all parties who submitted plots.
