<b>Bugzilla-Id:</b>	2398		
<b>Description</b>			
The default working dir for R in the RExpression actor is set to the users \$HOME directory. This causes a buildup of many temp files. Move the default to some subdirectory of .kepler so that it is removed when .kepler is deleted.			
Also consider removal of contents when Kepler is shut-down(?)			
Dan Higgins (April 5, 2006)			

History

- #1 - 06/08/2006 01:47 PM - Dan Higgins  
default R home changed to .kepler
