

## Metacat - Bug #240

### data file upload does not allow the client to specify an id

06/20/2001 11:29 AM - Chad Berkley

<b>Status:</b>	Resolved	<b>Start date:</b>	06/20/2001

<b>Bugzilla-Id:</b>	240		
<b>Description</b>			
The current file upload utility in metacat needs to be altered so that a client can specify the id of the file being uploaded. We should consider just ignoring the http problem and using the standard PUT method for this. it would make uploading much easier and much more uniform.

### History

#### #1 - 07/19/2001 02:57 AM - Matt Jones

Fixed. ID can now be specified (actually, it MUST be) using the new http based file upload feature that was implemented (see bug 191). The entire socket-based file upload implementation has been removed from metacat and replaced with http.
