changing your password also doesn't work

#2 - 06/13/2006 10:17 AM - Chad Berkley

This actually works with a normal install. It just doesn't work on vegbank.org. I have successfully logged out and changed my password on my machine. When we re-install vegbank on the vegbank machine following the work we're doing, i think these functions will work fine.
