Description

If you turn off welcome screen, then run kepler again. You will find kepler process keeps running after close all windows. We guess turning off welcome screen only makes it invisible.

History

#1 - 04/12/2006 01:12 PM - Dan Higgins

HINT: in Kepler, you can get the WelcomeWindow to show up again by deleting the file .ptolemyII in your 'home' direcotry.

#2 - 04/12/2006 02:34 PM - Christopher Brooks

I'll handle this one.
The problem is that we have a tableau associated with welcome window.
It will be a little while before I get to this.

#3 - 04/13/2006 11:54 AM - Christopher Brooks

Fixed by updating ptii/ptolemy/actor/lib/WelcomeWindow:
show(): Call super.close() because _close() expects that the window has been
rendered via successful completion of show() and that we can query the
checkbox. There was a bug where if user started Kepler, unchecked
"Show this Window at Startup" and then restarted Kepler, Kepler would
not exit.
