#### Description

On the Mac, if one uses the 'Create KAR from Actor' menu on a modified RExpression actor, the Browse button for setting the location where kar is to be stored is incorrect; i.e. it brings up a Open Dialog with no way of saving the file name! I suspect the call is to an OpenFileDialog, which works on Windows but is useless on the Mac for saving a file (due to OS defaults). Also, typing in the file apparently requires the complete path which is hard to do correctly.

#### History

##### #1 - 04/16/2006 07:20 PM - Dan Higgins

Corrected this problem by changing the OpenFileDialog to a SaveFileDialog

##### #2 - 03/27/2013 02:20 PM - Redmine Admin

Original Bugzilla ID was 2415
