#### Description

Users need to be able to ask metacat what the latest revision number for a document is. We currently have the getLastId function which returns the last used id number for a scope. We also need to be able to find the last used revision for a scope and an object number. For instance, if I sent in doc.1.1 and the last id used was doc.1.3, the function should return 4.

Both of these functions need to be exposed via the ecogrid-identifier EcoGrid interface.

#### History

##### #1 - 08/02/2006 11:36 AM - Chad Berkley

these functions were added when the identifier service was created.

##### #2 - 03/27/2013 02:20 PM - Redmine Admin

Original Bugzilla ID was 2418
