

Kepler - Bug #2419

turn Digir source 'off' as default data source

04/16/2006 07:45 PM - Dan Higgins

Status:	Resolved	Start date:	04/16/2006
Priority:	Normal	Due date:

Category:	data access	Estimated time:	0.00 hour
Target version:	1.0.0rc1	Spent time:	0.00 hour
Bugzilla-Id:	2419		
Description			
Digir source has not been working and this results in 'hung' data searches. Even when working, Digir greatly increases search time. I suggest that the source NOT be enabled in the default Kepler configuration. [User can then enable it as desired.]

In lib/config.xml file, new elements - selected are added to both service and document type. Kepler can read this setting to determine if the data quick search will include service or document type or not. So if we want to disable "digir", just set the "selected" element in false for both digir service and its document type.
