

Metacat - Bug #243

metacat returns error that is not an xml document

06/22/2001 03:08 PM - Chad Berkley

Status:	Resolved	Start date:	06/22/2001
Priority:	Immediate	Due date:

Target version:	Postpone	Spent time:	0.00 hour
Bugzilla-Id:	243		
<b>Description</b> The error "Connection reset by peer" is sometimes returned to the client when a document is returned. This error is not encased in the <error> tags that metacat should encase it in. This causes seemingly random connection errors from the clients POV.			

History

- #1 - 03/15/2004 10:57 AM - Jing Tao  
After clean-up dbconnection in metacat, this error is gone
- #2 - 03/27/2013 02:13 PM - Redmine Admin  
Original Bugzilla ID was 243
