#### Description

When saving a Data Package up to Metacat the id number for the table does not increase the revision number. Saving a change in a dp's table results in the table id changing from 190.1 to 191.1. The table id number should change to 190.2.

To test this create a dp and import a table. Save the dp. Then make and save a change to the table column data. The new id for the table will change to a new ids number rather than a revision number.

One thing to consider is that it would be hard to find the previous version of the data table on metacat if this occurs. This happens with Morpho saving locally and with saving to the network.

#### History

##### #1 - 06/30/2006 07:26 AM - Saurabh Garg

This is a bug in Morpho. Moving it to Morpho.

##### #2 - 07/26/2006 11:09 AM - Jing Tao

This is a duplicate bug and already was fixed.

##### #3 - 03/27/2013 02:20 PM - Redmine Admin

Original Bugzilla ID was 2430
