Description			
Currently, when you create a profile in morpho, two sample dps are placed in the data section. jscientist.2.1 is an eml-2.0.0beta6 document, and jscientist.7.1 is an eml-2.0.0 document. These should be replaced with an eml-2.0.1 document in new releases of morpho.

Do you have any candidate eml 2.0.1 document as example? Or we just make a tiny modification to transform jscientist.7.1 from 2.0.0 to 2.0.1?

As talked with Will, i update jscientist.7.1 to jscientist.7.2 by changed its name from eml200 to eml201. The beta6 eml was removed too.
