Target version:	Beta1	Spent time:	0.00 hour
Bugzilla-Id:	246		
Description			
Morpho will hang if metacat is not found on startup. It hangs after the connection dialog.			

History

#1 - 07/12/2001 05:57 PM - Matt Jones

Reassigning to higgins to try and make the ESA deadline.

#2 - 07/13/2001 05:52 PM - Dan Higgins

The specific problem at startup has been fixed by changing the settings to insure that Morpho does NOT try to query Metacat after the Cancel button in the Connection dialog is clicked. (Previously it might try to get data after Cancel for the list of User docs.) The apparent 'hang' was probably due to Metacat not sending a response rather than connection being down.

There may still be a problem with Matacat hanging during submissions and queries since there is no indication (e.g. fluttering butterfly) on those screens indicating that a query is in progress, or some method for cancelling.
