Description

Data Packages created with eml.2.0.0 do not display correctly when using the ESA, KNB, NRS, OBFS and NCEAS skins on Internet Explorer.

knb: <http://knb.ecoinformatics.org/knb/metacat?action=read&qformat=knb&docid=nceas.146>

nceas: <http://knb.ecoinformatics.org/knb/metacat?action=read&qformat=nceas&docid=nceas.146>

Data packages that contain this in the eml file have problems transforming correctly. <eml:eml xmlns:eml="eml://ecoinformatics.org/eml-2.0.0" xmlns:stmml="http://www.xml-cml.org/schema/stmml" xmlns:ds="eml://ecoinformatics.org/dataset-2.0.0" xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" packageId="nceas.146.5" scope="system" system="knb" xsi:schemaLocation="eml://ecoinformatics.org/eml-2.0.0 eml.xsd">

Data Package nceas.146 is the first one in the NCEAS list of data packages when Browse existing NCEAS data sets is chosen.

History

#1 - 06/30/2006 03:42 PM - Saurabh Garg

eml-2.0.1 stylesheets will be used for displaying eml-2.0.0 namespace documents.
