

Metacat - Bug #247

metacat inserts ids into some files

07/10/2001 03:55 PM - Chad Berkley

Status:	Resolved	Start date:	07/10/2001

Description

Metacat sometimes inserts ids into files with the old "meta_file_id" tags. it inserts them incorrectly because it does not include the rev number. This may not be needed now since morpho inserts ids before it inserts the document into metacat. The problem right now is that metacat overwrites the correct id that morpho puts in (an id with a rev number) and writes an incorrect id into the file. This only happens with metadata files that have the old style id tags.
