

VegBank - Bug #2483

Link into site the new searchable data dictionary (and glossary?)

Description			
We need a searchable data dictionary and glossary of terms. Perhaps the simplest thing would be to add a few tables to the database that contains the information in the data dictionary (like VegBranch), then hook up our views to that table, meaning we could simply display, search, and update information in it.			

History

#1 - 08/14/2006 04:40 PM - Michael Lee

Mlee can do this after Chad leaves if need be.

#2 - 08/30/2006 01:54 AM - Michael Lee

Searchable data dictionray now exists on aldo:

http://aldo.vegbank.org/vegbank/views/dba_tabledescription_summary.jsp

need to hook it into the site and create index page, plus relink .htaccess and make sure that all the different kinds of pages are covered (pop-up may still be needed).

#3 - 08/31/2006 08:36 PM - Michael Lee

Done. Data dictionary now searchable and you can do negative searches too, plus it highlights the found terms in the results page. Highlighting javascript could be reused elsewhere, too!
