<b>Description</b>			
When installing and trying to load the Windows beta2 release installation (without jvm), I get an invalid jvm error.			

History

I have tries a non-jre install on one PC where Kepler had never been installed. In this case, there was no problem. Kepler installed and then executed without any problem. So, thusfar I am unable to reproduce the problem! (ant thoughts out there on how to repeat the problem?)

#2 - 04/06/2007 03:45 PM - Dan Higgins

will reopen if anyone can reliably reproduce the problem
