

## Kepler - Bug #2513

### Some actors not included in 'ant generateDoc' target

08/15/2006 12:59 PM - Dan Higgins

#### Description

The ant target 'generateDoc' uses the XSLT transform 'getActors.xsl' to generate a file called 'ActorList.txt' from the kepler src/actors/ directory. However, this depends on "match="entity/property[@name='class']" in the actors MOML/xml file. Not all the actors have such a path (e.g. Annotations, any Parameter) so that a number of lines in the ActorList file have no associated actor Name! Also there are multiple RExpression actor lines and multiple WebServiceActor lines in this file (not getting derived actor info correctly).

#### History

##### #1 - 05/18/2007 11:41 AM - Chad Berkley

this bug is no longer valid because we don't generate docs like this anymore.

##### #2 - 03/27/2013 02:20 PM - Redmine Admin

Original Bugzilla ID was 2513
