

VegBank - Bug #2525

implement "request accessionCode" that is now available on VegBank

08/25/2006 12:21 AM - Michael Lee

Status:	Resolved	Start date:	08/25/2006
Priority:	Normal	Due date:	
Assignee:	Michael Lee	% Done:	0%
Category:	vegbranch	Estimated time:	0.00 hour
Target version:	UnMilestoned	Spent time:	0.00 hour
Bugzilla-Id:	2525		
Description			
Use URLs like so: http://aldo.vegbank.org/vegbank/views/getNewRequestID.jsp?tablename=reference&recordcount=4 to get real accession codes (if the user wants them) to allow keeping of VegBranch data and reinterpretation.			

History

this now works, and there is an option to turn it off and generate them locally only. It's a bit slow, but it does work.

Still needs some testing to make sure it's robust, and how the rest of the system works with these new codes (ie adds plots to XML output if there are annotations).

#2 - 09/06/2006 09:45 AM - Michael Lee

User can use local VegBranch accessionCodes or VegBank preassigned ones. Works well, but takes a bit longer to get accessionCodes from VegBank. Prompts the user to decide when VegBranch opens for the first time.
